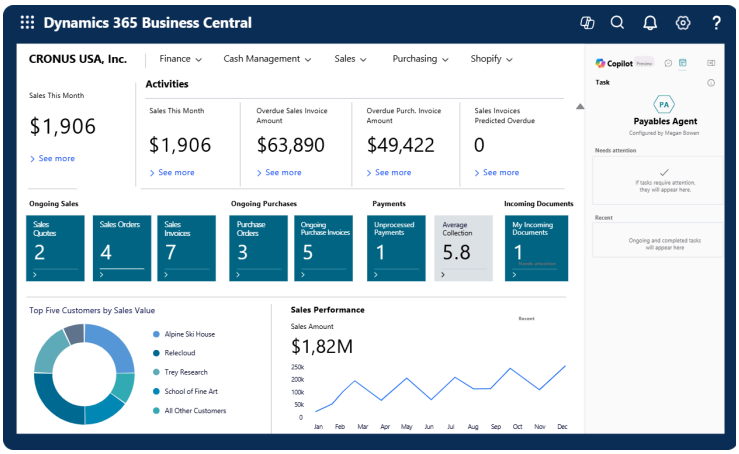
12 weeks to go live

Production linked to stock and finance.

Twelve weeks from kick-off to go live. A fixed scope, a fixed timeline and AI agents built in. For packing, light manufacturing and assembly operations.

Book a *discovery call.*

enquiry@9dots.com
We confirm the scope with you on the call.



SUITED TO

- Packing operations
- Light industrial manufacturers
- Assembly operations

Business Central, the platform behind Jumpstart ERP Assembly.

01

Fixed scope

Finance and trade, plus bills of materials and assembly orders. Set up, data loaded and your team trained.

02

Fixed time

Six stages from kick-off to go live. You always know the day and the next step.

03

AI included

Microsoft Copilot Payables Agent and Sales Order Agent, and PRIME Material Shortage Agent.

HOW WE DELIVER

Kick-off to go live in 12 weeks.

One method. Six stages. You do the business work and we do the system work.

01 DAY 1 — Kick-off and provision

YOU
Confirm the package and owners.

WE
Run the meeting and set up your Business Central.

02 DAY 2–21 — Prepare

YOU
Complete our Excel templates.

WE
Guide you through each field.

03 DAY 22–43 — Load

YOU
Supply source reports.

WE
Import, validate and reconcile opening balances.

04 DAY 44–51 — Learn

YOU
Key users attend role-based training.

WE
Train on the modules, Copilot and PRIME.

05 DAY 52–59 — Test

YOU
Run real scenarios and sign off.

WE
Fix every finding.

06 DAY 60–84 — Go live

YOU
Work in Business Central.

WE
Stay beside you through go-live.

Included in the fixed price

+ Implementation with data migration, training and testing
+ Finance, trade, bills of materials and assembly orders
+ Payables, Sales Order and PRIME Material Shortage Agents
+ One Microsoft 365 Copilot Business licence for one nominated user in Year 1

Charged separately

– Business Central Essentials licences for all users
– Work outside the fixed scope
– Support after go-live
– Copilot Credits used by AI agents

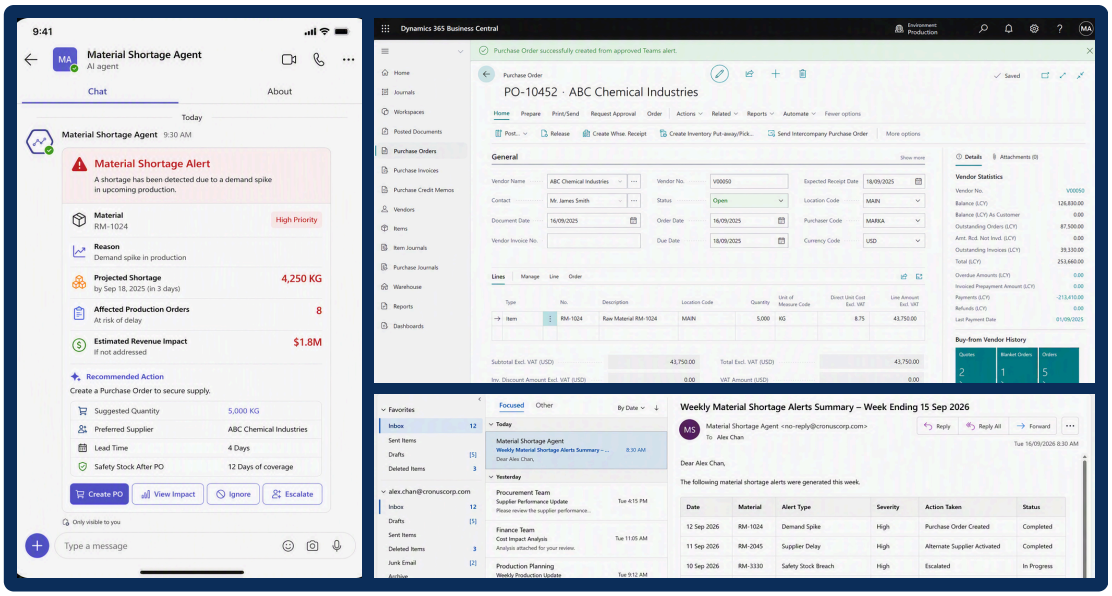
From Year 2 you renew Business Central and Microsoft 365 Copilot Business licences per user per year.
Our Application Management Services keep your system running after go-live.

ASK PRIME MATERIAL SHORTAGE AGENT

“Which materials will run short before production needs them?

4,250 kg

8 production orders at risk. The projected shortage is 4,250 kg of one raw material. That is the answer PRIME gave in our example. It read your live Business Central data and recommended a purchase order for you to approve.



STEP 1

Ask

Ask about material availability in plain language, or wait for the PRIME alert in Teams.

STEP 2

Analyse

PRIME checks production orders, bills of materials, stock, purchase orders and lead times.

STEP 3

Act

PRIME recommends the supplier, quantity and lead time. You approve the purchase order.

Payables Agent

Drafts purchase invoices from supplier invoices for you to review. Your team stops retyping invoices.

Sales Order Agent

Reads customer emails, matches the customer and items in Business Central and drafts the sales order for you to review.

Copilot, free in Year 1

Copilot works across the Microsoft apps your team already uses.

AI agents use Copilot Credits. You can buy credits as prepaid capacity or pay as you go.

SELECTED CUSTOMERS

One platform, four industries.

Assembly teams use Business Central to plan materials and track production costs.

IB Vogt Malaysia

UTILITIES AND ENERGY · MALAYSIA

Every solar project's costs, clear at a glance.
