AI Agents For the SAP Business One You Already Run

Three PRIME AI agents are live today on SAP Business One. They turn purchase orders, stock levels and sales data into work that a person reviews. You do not need to replace your ERP.

INTRODUCING PRIME FOR SAP B1

AI Agents That Already Speak SAP Business One

PRIME is our library of purpose-built AI agents. For SAP Business One, three are live. They read and write standard SAP Business One objects through SAP's native APIs.

LIVE TODAY

PO-to-SO Agent

ORDERHUB

Extracts a customer purchase order (PDF or email), matches it against the corresponding customer and product records in SAP B1 and prepares the sales order for release.

Human control A person reviews the matched sales order before it is confirmed. The agent never releases an order unsupervised.

LIVE TODAY

Stock Optimisation Agent

INVENTORYHUB

Monitors stock levels, committed quantities and demand across SAP B1 to flag shortages and overstock, and recommends replenishment action.

Human control Planners and buyers decide reorder quantities and timing. The agent recommends and never raises a purchase order itself.

LIVE TODAY

Sales Performance Analytics Agent

INSIGHTHUB

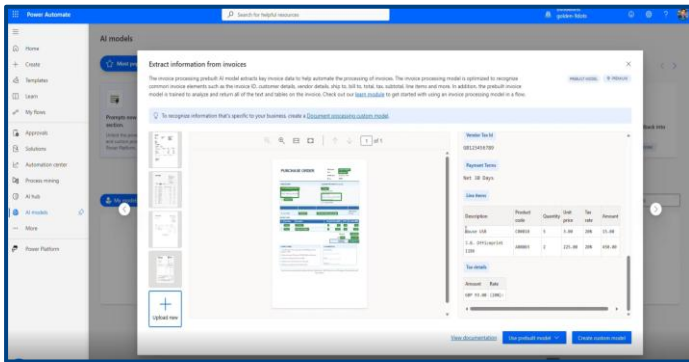

Analyses sales orders across customers, products and regions to surface trends, margin shifts and buying patterns for management review.

Human control The agent reports and recommends. It does not change pricing, quotas or customer records.

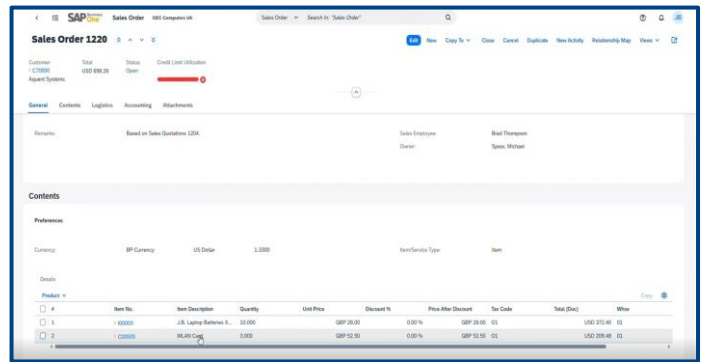

MORE HUBS ARE COMING CustomerHub, BidHub, ProcurementHub, DeliveryHub, FactoryHub, FinanceHub and PeopleHub agents follow the same reviewed, human-in-the-loop pattern as they are built for SAP Business One.

AGENTS IN ACTION

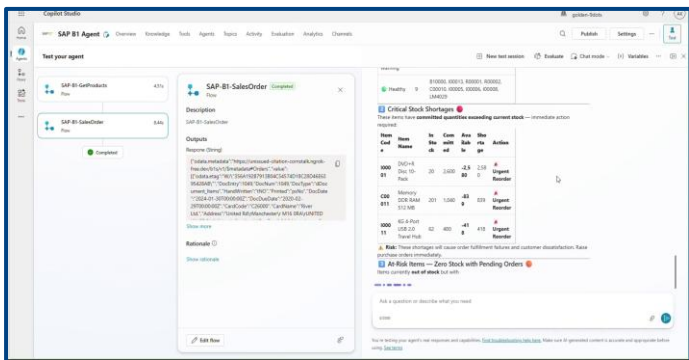

Inside Copilot Studio and SAP Business One

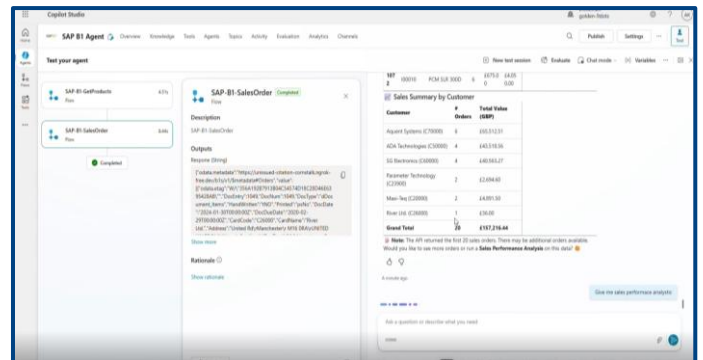

1. PO received & extracted Microsoft AI Builder reads the incoming purchase order and extracts vendor, line items and quantities.

2. Live in SAP Business One The finished sales order appears in SAP B1 exactly as if entered by hand, ready to review and fulfil.

3. Prioritised stock recommendations Critical shortages ranked with an urgency flag, alongside items that need no action.

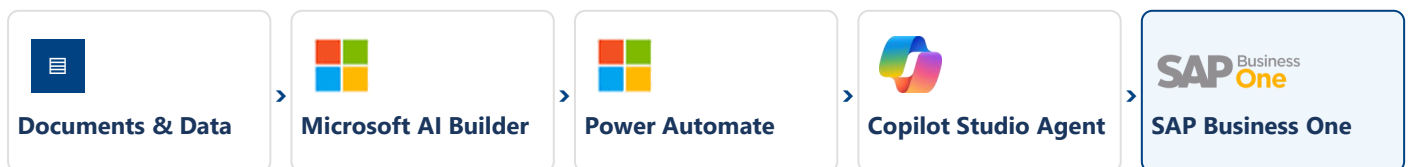

4. Sales performance summary Orders and value rolled up by customer, ready for a sales leadership conversation.

UNDER THE HOOD

Built on Microsoft Copilot and Connected to SAP B1

Microsoft-native or SAP-native at every layer, with no proprietary black box in between and no bolt-on database.

THE TEAM BEHIND PRIME AI AGENTS

Why 9 Dots Consulting

- Microsoft Managed Partner (APAC)
- Microsoft Tier-1 Cloud Solution Provider (CSP Direct)
- Microsoft ECIF Green Partner
- cegid Cegid Platinum Partner

Book a PRIME for SAP Business One Discovery Call

Choose PO-to-SO, Stock Optimisation or Sales Performance Analytics as your first agent. We scope it against your SAP Business One environment. PRIME is licensed by agent, not by a fixed bundle. Need something else? We build bespoke agents. Each user needs Microsoft 365. Your tenant needs one Copilot Studio pack.
